

Yolo Subbasin Groundwater Agency

Groundwater Sustainability Plan

Sustainable Groundwater Management Act

In 2014, California enacted the Sustainable Groundwater Management Act (**SGMA**) to better manage groundwater for long-term sustainability. There are six **sustainability indicators** within **SGMA** – sustainability is achieved by avoiding significant and unreasonable conditions for these six **sustainability indicators**:

Lowering of
Groundwater Levels

Reduction of
Groundwater Storage

Surface Water
Depletion

Land Subsidence

Water Quality
Degradation

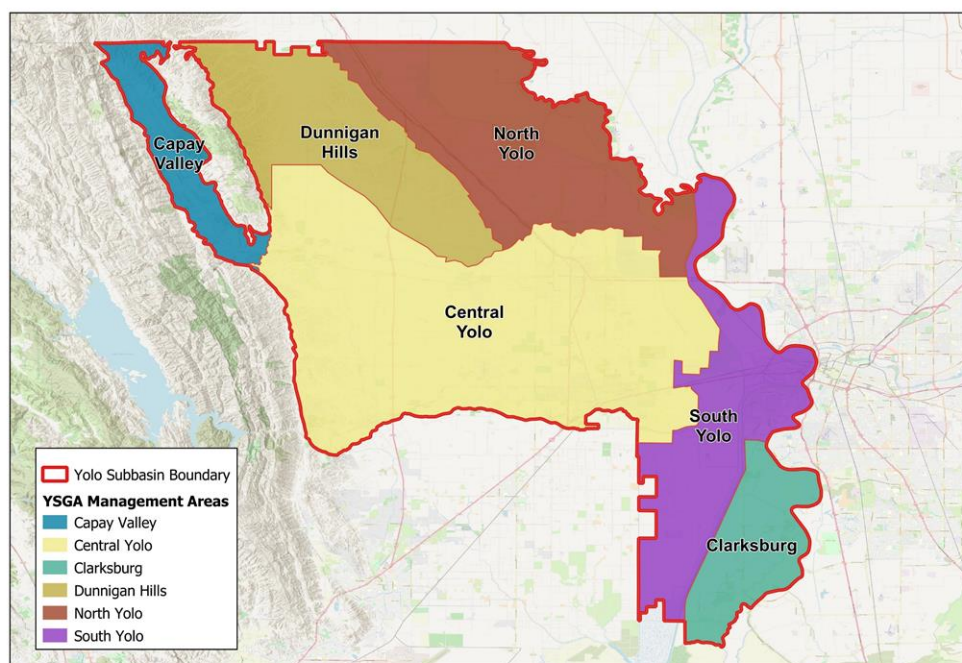

Sea Water
Intrusion

The Yolo Subbasin Groundwater Agency (YSGA) was formed in June 2017 to serve as the Groundwater Sustainability Agency for the Yolo Subbasin. Since 2017, the YSGA has been focused on developing a Groundwater Sustainability Plan (GSP). The Yolo Subbasin GSP will consider all beneficial users and will define a sustainability goal for the Yolo Subbasin.

The Yolo Subbasin GSP is due to the Department of Water Resources by **January 31, 2022**.

Please join us for a virtual update on the YSGA's process of developing the Yolo Subbasin GSP.

December 18, 2020 1-3 p.m.

Location: Remote, online meeting via GoToMeeting.
