

Yolo Subbasin Groundwater Agency

Board of Directors Meeting Agenda

Monday, July 20, 2026

3:00 p.m. to 5:00 p.m.

Woodland Police Department

1000 Lincoln Ave, Woodland, CA 95695

The public may participate in the meeting remotely via Zoom using the following information:

Please join my meeting from your computer, tablet or smartphone.

<https://us06web.zoom.us/j/7847507621>

You can also dial in using your phone.

United States: +1 669 444 9171

Access Code: 784 750 7621

NOTICE TO PUBLIC

Public documents relating to any open session item listed on this agenda that are distributed to all or most of the members of the Board of Directors less than 72 hours before the meeting are available for public inspection in the customer service area of the Yolo Subbasin Groundwater Agency's Administrative Office at 34274 State Highway 16, Woodland 95695. The full agenda packet can also be found on www.yologroundwater.org.

In compliance with the Americans with Disabilities Act, if you have a disability and need a disability-related modification or accommodation to participate in this meeting please contact YSGA office at (530) 662-3211. Requests must be made as early as possible, and at least one full business day before the start of the meeting.

All items on the agenda will be open for public comment before final action is taken. Speakers are requested to restrict comments to the item as it appears on the agenda and stay within a three-minute time limit. The Chair has the discretion of limiting the total time for an item. Comments may also be submitted via email to info@yolosga.org prior to the meeting or via teleconference chat during the meeting.

-
- 3:00 1. CALL TO ORDER AND DETERMINATION OF QUORUM**
- 3:05 2. ADDING ITEMS TO THE POSTED AGENDA** -- In order to add an agenda item, it must fit into one of the following categories: a) A majority determination that an emergency (as designed by the Brown Act) exists; or b) A 4/5ths determination that the need to take action arose subsequent to the agenda being posted.
- 3:08 3. PUBLIC FORUM** -- The Public may address the Yolo Subbasin Groundwater Agency Board of Directors on any item of interest not appearing on the agenda that is within the subject matter of the YSGA.

- 3:10 4. **CONSIDERATION: CONSENT ITEMS**, [pages 3-39](#)
- a. Approve May 18, 2026 Regular Board of Directors Meeting Minutes, [pages 8-14](#)
 - b. Approve Payment of Bills in Approved Fiscal Year 2025-2026 Budget, [page 3](#)
 - c. Receive Financial Statements for 05/15 through 07/07/26, [pages 15-25](#)
 - d. Receive Minutes of Executive Committee Meetings: 05/11 and 06/16/26, [pages 26-29](#)
 - e. Approve Grant-Funded Contract Amendments, [pages 4-6](#)
 - f. Approve Hungry Hollow Groundwater Working Group Consent Items, [pages 30-34](#)
 - g. Letter to Yolo County Board of Supervisors, [pages 35-39](#)
- 3:15 5. **CONSIDERATION: ENTER INTO CONTRACT WITH COLLIER GEOPHYSICS**, [pages 40-43](#)
- 3:20 6. **CONSIDERATION: LETTER OF SUPPORT FOR COLUSA COUNTY WATER DISTRICT USBR WATERSMART GRANT APPLICATION**, [pages 44-45](#)
- 3:25 7. **PRESENTATION: FEE STUDY UPDATE**, [pages 46-47](#)
- 3:50 8. **PRESENTATION: REPORT OF THE CHAIR AND EXECUTIVE OFFICER**, [pages 48-57](#)
Executive Officer report on activities since last Board meeting
- 4:00 9. **PRESENTATION: SGMA IMPLEMENTATION GRANT PROJECT UPDATES**, [pages 58-71](#)
- 4:55 10. **MEMBERS' REPORTS AND FUTURE AGENDA ITEMS** -- Yolo Subbasin
Groundwater Agency Members are invited to briefly report on current issues and recommended topics for future Yolo Subbasin Groundwater Agency Board of Directors meetings.
- 5:00 11. **NEXT MEETING** – Regular meeting on September 21, 2026.
- 5:00 12. **ADJOURNMENT**

Consideration of items not on the posted agenda includes items in the following categories: 1) majority determination that an emergency (as defined by the Brown Act) exists; or 2) a 4/5ths determination that the need to take action arose subsequent to posting of the agenda. I declare under penalty of perjury that the foregoing agenda was posted by July 17, 2026 and made available to the public during normal business hours at the following location: Woodland Police Department 1000 Lincoln Ave, Woodland, CA 95695 and YSGA's office at 34274 State Highway 16, Woodland 95695.

Kristin Sicke, Executive Officer

Yolo Subbasin Groundwater Agency Board of Directors

Meeting Agenda Report

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 4

SUBJECT: Consideration: Consent Items

INITIATED OR ☐ BOARD ☐ INFORMATION
REQUESTED BY: ☒ STAFF ☒ ACTION: ☒ MOTION
☐ OTHER _____ ☐ RESOLUTION

ATTACHMENT ☒ YES ☐ NO

BACKGROUND

a. Approve the May 18 Regular YSGA Board of Directors Meeting Minutes

Pursuant to Section 54957.5 of the Brown Act, copies of the draft minutes are available to the public at the Board meetings prior to their approval.

b. Approve Payment of Bills in Approved Fiscal Year 2025/2026 Budget

Approve payment of bills listed in the table below. The *Professional Services Summary Table* provides an overview of all current YSGA contracts.

Company	Invoice #	Description	Work Period	Amount	Notes
Davids Engineering	7647	TAC Participation	June 2026	\$805.00	SGMA Grant Reimbursable
LSCE	45004	Geologic Cross-Sections	June 2026	\$2,800	SGMA Grant Reimbursable
SEI	10109	Modeling WaterSMART	June 2026	\$27,131.91	USBR Grant Reimbursable

Professional Services Summary Table

Contractor	Services Provided	Contract Total	Contract Period	Expended to Date	As of	Funding Source
Consero Solutions	Facilitation and Outreach	\$106,000	May 2025 – Jun. 2026	\$107,400.04	6/30/2026	SGMA Grant
Davids Engineering	TAC Participation	\$10,000	July 2025 – Feb. 2027	\$6,208.75	6/30/2026	SGMA Grant
Downey Brand	Legal services	n/a	n/a			YSGA Funds
HEC (Hansford Economic Consulting)	Fee Study Professional Services	\$141,000	July 2025 – Oct. 2026	\$137,936.68	6/30/2026	SGMA Grant, YSGA Funds
INTERA Inc.	Addressing GSP Corrective Actions	\$295,000	Sep. 2024 – Feb. 2027	\$265,060.50	12/31/2025	SGMA Grant

Contractor	Services Provided	Contract Total	Contract Period	Expended to Date	As of	Funding Source
Leafbird Consulting	Modeling & technical support	\$173,024	Jan. 2024 – Feb. 2027	\$113,523	6/30/2026	SGMA Grant
Leafbird Consulting	WaterSMART grant model improvements	\$125,500	Nov. 2024 – Sep. 2026	\$103,200	6/30/2026	USBR Grant
LSCE	Hydrogeologic Data Analysis & Review	\$45,000	July 2025 – Feb. 2027	\$44,986	6/30/2026	SGMA Grant
SEI	Modeling & technical support	\$300,976	Jan. 2024 – Feb. 2027	\$249,108.57	5/31/2026	SGMA Grant
SEI	WaterSMART grant model improvements	\$174,500	Nov. 2024 – Sep. 2026	\$88,980.55	6/30/2026	USBR Grant
WLS (Water and Land Solutions)	China Slough rehabilitation	\$684,800	Jan. 2024 – Feb. 2027	\$493,120.24	5/31/2026	SGMA Grant
Websoft Developers	Database management	\$258,000	Feb. 2024 – Feb. 2027	\$137,810	2/28/2026	SGMA Grant
West Yost Associates	TAC Participation & Hungry Hollow support	\$55,000	July 2025 – Feb. 2027	\$39,461.10	5/31/2026	SGMA Grant
YCFC&WCD	Admin & tech services	\$800,000	Jul. 2025 – Jun. 2026	\$352,934.97	3/31/2026	YSGA Funds, USBR Funds, SGMA Grant

c. Receive Financial Statements

Receive financial statements for FY 2025-26: May 15 through July 7, 2026.

d. Receive Minutes of Executive Committee Meetings

Receive YSGA Executive Committee meetings minutes for May 11 and June 16, 2026.

e. Approve Contract Amendments

- a. Hansford Economic Consulting (HEC).* The Executive Committee is recommending a contract amendment from \$141,000 to \$156,000 for HEC to continue to support YSGA in preparing tax roll and hand bill information, processing fee payments and fee study corrections, and to consider the additional effort needed as the fee study process evolved (efforts not in the original scope). The contract amendment will be funded by reallocated SGMA Implementation Grant funds and will have no impact on the YSGA general fund.

Specifically, efforts to develop the fee were greater than anticipated for Tasks A.4 and A.5, which ultimately accounted for YSGA’s unique customer needs. The analysis required greater in-depth research related to water use and perceived equities between member agencies and stakeholders in different areas of the subbasin and development of more fee structure options, which were presented to the Finance Committee, than was anticipated in development of the original scope. In total, the Finance Committee and subset group of water providers reviewed 8 fee

structure options (3 options for Tier 1, 2 options for Tier 2 Agricultural users, and 3 options for Tier 2 Domestic users). Research into agency and water provider boundaries and the appropriateness of charging the Yolo Basin Wildlife Area (YBWA) was much more in-depth than anticipated in development of the scope and budget.

Remaining items in the scope of services, Task B.1, to complete include:

- Preparation of final database with 2025 LandIQ data and most recent Yolo County and Solano County assessor parcel data
- Assistance with completion of all required documentation to obtain a tax code with each county.
- Submission of tax rolls to Yolo and Solano counties.
- Preparation of all data required for YSGA to send invoices to non-taxable parcels and water systems, and community water systems, UC Davis, YBWA, and Yocha Dehe Wintun Nation.

Additional items identified as needed, not included in the original scope of services, listed below and added to the scope as Task C.1.

- Assistance with development of a reserve policy.
- Assistance with development of an appeals and corrections process.
- Correction of the parcel database to account for ‘child’ parcels which the Auditor-Controller uses to place fees on the tax roll.
- Correction of the parcel database to account for corrections granted prior to implementation of the fee (dry farmed fields) inaccurately identified by LandIQ.
- Training YSGA staff on data development and fee calculation to enable staff to respond to fee inquiries and reduce reliance on consultants with the fee administration.

- b. *INTERA*. The Executive Committee is recommending a contract amendment from \$295,000 to \$325,000 to support YSGA in preparing and submitting the 2027 GSP Periodic Evaluation by January 31, 2027. The additional support includes additional meetings, review of TAC and public comments, and revisions to the draft 2027 GSP Periodic Evaluation, which were not in the original scope. The contract amendment will be funded by reallocated SGMA Implementation Grant funds and will have no impact on the YSGA general fund.
- c. *Ludhorff & Scalmanini Consulting Engineers (LSCE)*. The Executive Committee is recommending a contract amendment from \$25,000 to \$45,000 to support YSGA in preparing updated geologic cross sections for Hungry Hollow and Yolo Zamora that includes AEM and t-TEM data. The original contract called for LSCE to provide

comments and feedback on the YSGA’s cross sections, but evolved into LSCE creating updated cross sections that incorporate the AEM and t-TEM data since YSGA staff did not possess the software to do so cost-effectively. The contract amendment will be funded by reallocated SGMA Implementation Grant funds and will have no impact on the YSGA general fund.

Firm	Contract Delta	Funding Source	Schedule	Reviewed by EC
HEC	+\$15,000	SGMA Grant	All tasks complete by October 2026	July 8, 2026
INTERA	+\$30,000	SGMA Grant	All tasks complete by Jan. 2026	June 16, 2026
LSCE	+\$20,000	SGMA Grant	All tasks complete by Oct. 2026	January 22, 2026

f. Hungry Hollow Groundwater Working Group Consent Items

- a. Approve appointing Emily Reinhart of Bullseye Farms to replace Geoff Klein as a voting member of the Working Group.
- b. Western Hills Erosion Control and Flood MAR Project: Landowners and YCFC&WCD staff have identified several erosion and flood control issues that originate from the western hills (north of Cache Creek and west of the Hungry Hollow Area) that will have a significant impact on the success of other identified projects in the area. A full description of the project and its ranking is included as an attachment below.

g. Approve Submitting the Letter to Yolo County Board of Supervisors

While YSGA and the County’s groundwater-related authorities are distinct, they remain closely interconnected. Our collective success will depend on how effectively we coordinate and collaborate to address these challenges moving forward. The YSGA Executive Committee drafted the attached letter that provides the YSGA Board’s opinion on the current state of the moratorium on new agricultural wells within Yolo County, an update on the YSGA’s implementation of the Groundwater Sustainability Plan, and opportunities for collaboration.

RECOMMENDATION

- a. Recommend adoption of May 18 Regular Board meeting minutes with any corrections.
- b. Recommend approval of payment of bills.
- c. This agenda item is for informational purposes only. No Board action is required.
- d. This agenda item is for informational purposes only. No Board action is required.
- e. Recommend approval of contract amendments for HEC, INTERA, and LSCE.

- f. Recommend approval of appointing Emily Reinhart to Hungry Hollow Groundwater Working Group, and adding the Western Hills Erosion Control and Flood MAR Project to the list of Prioritized Projects.
- g. Recommend approval of submitting the letter to Yolo County Board of Supervisors

YOLO SUBBASIN GROUNDWATER AGENCY MINUTES OF BOARD OF DIRECTORS MEETING

May 18, 2026, 3:00 p.m. – 5:00 p.m.
Hosted at Woodland Police Department and via Zoom
1000 Lincoln Ave, Woodland CA

1. CALL TO ORDER AND DETERMINATION OF QUORUM

Meeting called to order at 3:01 p.m. by Carol Scianna, Chair. Executive Officer Sicke conducted a roll call and determined a quorum was present. The following Board members and alternates were in attendance:

- City of West Sacramento: Verna Sulpizio Hull
- City of Winters: Carol Scianna
- City of Woodland: David Moreno
- Dunnigan Water District: David Schaad, Jordon Navarrot
- Madison CSD: Leo Refsland *(Item 5 – end)*
- Reclamation District (RD) 108: Jordon Navarrot
- RD 150: Warren Bogle
- RD 307: James Johas *(Item 5 – end)*
- RD 537: Tom Ramos
- RD 730: Geoff Klein
- RD 765: David Dickson Jr.
- RD 787: Dominic Bruno *(Item 1 – 6)*
- RD 999: Tom Slater
- RD 1600: Michele Clark
- RD 2035: Jesse Clark
- Rumsey Water Users Association: Jonathan Flora
- Yocha Dehe Wintun Nation: Marc Fawns *(Item 1 – 7)*
- Yolo County: Mary Vixie Sandy
- Yolo County Flood Control & Water Conservation District (YCFC&WCD): Tom Barth
- UC Davis: Courtney Doss
- Cal Am Water – Dunnigan: Evan Jacobs
- Colusa Drain MWC: Lynnel Pollock, Jim Wallace
- Yolo County Farm Bureau: Lee Smith
- Environmental Representative (Yolo RCD): Jeanette Wrysinski

Absent: City of Davis, Esparto CSD

**remote attendance, member was non-voting*

***remote attendance, member provided just cause pursuant to AB 2449*

2. ADDING ITEMS TO THE POSTED AGENDA

There were no items to add to the agenda.

3. PUBLIC FORUM

Nothing to report.

4. CONSIDERATION: CONSENT ITEMS

- a) Approve March 23, 2026 Regular and March 10 and April 21, 2026 Special Board of Directors Meetings' Minutes
- b) Approve Payment of Bills in Approved Fiscal Year 2025-26 Budget
- c) Receive Financial Statements for 03/18/26 through 05/14/26
- d) Receive Minutes of Executive Committee Meetings: 02/23/26 and 04/09/26
- e) Approve Appointment of Josh Yarborough to the Hungry Hollow Groundwater Working Group

Action

Approve Items 4a, b, and e, as presented.

Motion: YCFC&WCD (Barth)

Second: RD 2035 (Clark)

Vote: Approved (roll call attached)

5. PUBLIC HEARING: YOLO SUBBASIN FEE STUDY ADOPTION

Kristin Sicke, Executive Officer, and Catherine Hansford, Hansford Economic Consulting (HEC), presented the final Fee Study Report to the Board.

Public Hearing: Chair Scianna opened the public hearing at 3:29 p.m.

Public Comment: Kristin provided written comments received via email to the Board, attached to the minutes. Nancy Lea presented two letters by Duane Chamberlain and Joe Heidrick as well as her concerns about dry land farmers. Casey Stone spoke to the Board about his concerns about the fee being applied to dry land farmers. Vicky Murphy addressed the Board about the impact of the fee on her ranch in the Capay Valley and provided comments on behalf of Merrie Tompkins.

Hearing closed at 3:42 p.m.

Board Discussion:

Director Pollock asked staff to follow up with the dry land farmers who spoke today to identify their parcels and how much was in the YSGA Boundary. Director Klein spoke about the importance of keeping the agency diligent with funding and budgets. Director Smith commented about the importance of further consideration for dry land farmers, and making sure the representation of the YSGA Board reflects the fee structure. Director Barth asked about the history of the Subbasin boundaries, how it relates to which properties are included in the fee, and what the process is for boundary modification. Kristin clarified that the Subbasin boundaries must be agreed to by the State Department of Water Resources. Director Sulpizio Hull asked what additional processes would be needed in order to reconsider the fee structure by 2028. Erik Cadaret clarified that the process may require an updated fee study and new public outreach.

Director Clark asked Kristin to elaborate on the appeals and corrections process. Kristin stated that the process as written is aimed at correcting dry land acreage that is improperly classified as “cropped”. Director Pollock commented that some corrections may be needed specific to the Colusa Drain MWC boundary. Staff will work with Director Pollock to make sure the correct parcel list is used.

Action

Direct staff to return with staff report examining alternative fee structures for Clarksburg Management Area, and dry land farmers before 2028 regulatory fee adoption.

Motion: YCFB (Smith)

Second: RD 999 (Slater)

Discussion: Director Klein asked about other surface water-dependent areas. Director Smith clarified that the data for that scale is not available and declined to add that to his motion.

Vote: Approved (roll call attached – see item 5a)

Action

Adopt Resolution 26.01 approving the Sustainable Groundwater Management Fee Study, adopting the fees as presented, and adopting a Fee Corrections and Appeals Process.

Motion: RD 108

Second: RD 2035

Vote: Approved (roll call attached – see item 5b)

Action

Adopt Resolution 26.02 requesting collection of charges on Yolo County tax roll.

Motion: Yolo County (Sandy)

Second: UC Davis (Doss)

Vote: Approved (roll call attached – see item 5c)

6. CONSIDERATION: FISCAL YEAR 26/27 BUDGET AND WORKPLAN

Erik Cadaret presented the proposed Fiscal Year 26/27 budget and workplan to the Board. Director Schaad clarified that the reserve policy is still being refined, and the adopted budget can be revisited once the reserve policy is in place. Kristin confirmed that to be the case.

Action

Approve item 6 as presented.

Motion: Dunnigan Water District (Schaad)

Second: RD 2035 (Clark)

Vote: Approved (roll call attached)

7. CLOSED SESSION: EXISTING LITIGATION

Closed session conference with legal counsel – existing litigation under Government Code section 54956.9(d)(1), Sacramento Superior Court Case No. 26WM00070.

The Board entered closed session at 4:20 and exited at 4:45.

Closed Session Report: Chair Scianna reported that the Directors, Executive Officer Sicke, Staff Cadaret, Leicht, and Fisher, and Legal Counsel Cho participated in the meeting. RD 787 was recused. There was nothing to report.

8. CONSIDERATION: RD108 MANAGEMENT OF FAIR RANCH

- A. Enter into a Memorandum of Understanding with Yolo County and Reclamation District 108 Regarding RD 108's Management of Fair Ranch.

Action

Approve Items 8a as presented.

Motion: YCFB (Smith)

Second: RD 2035 (Clark)

Vote: Approved (roll call attached)

- B. File Notice of Exemption for MOU with Yolo County and RD 108.

Action

Approve Items 8b as presented.

Motion: CDMWC (Pollock)

Second: Environmental Representative (Wrysinski)

Vote: Approved (roll call attached)

9. REPORT OF THE CHAIR AND EXECUTIVE OFFICER

YSGA staff provided the following updates:

- Current groundwater levels are 5.7 ft above this time last year and 27 feet higher than this time in 2022.
- A Yolo County Urgency Well Ordinance meeting was held on April 2. YSGA and County staff provided an update to the County Board of Supervisors on April 28. The Board of Supervisors will consider extending the ag well moratorium at their July 21 meeting.
- Since the last Board of Directors meeting, one new well was verified by YSGA outside of the Focus Areas.

10. SGMA IMPLEMENTATION GRANT PROJECT UPDATES

Erik provided updates on SGMA Implementation Grant Projects to the Board:

- YCFC&WCD recharged approximately 4,500 AF this winter.
- Maddie Munson, Water and Land Solutions, presented the results of the Yolo-Zamora Groundwater Recharge technical memorandum. She presented a variety of project options that have been considered along with the corresponding costs; she also detailed the next steps for the project.

11. MEMBERS' REPORTS AND FUTURE AGENDA ITEMS

Director Jacobs reported that California American Water headquarters will be moving to West Sacramento this summer. Director Navarro reported that the Nichols Farm is having an event tomorrow, and Dunnigan Water District will be speaking at it.

12. NEXT MEETING

Next regular meeting on July 20, 2026

13. ADJOURNMENT

Adjourned at 5:10 p.m.

Respectfully submitted,

Kristin Sicke
Executive Officer, Board Secretary

YOLO SUBBASIN GROUNDWATER AGENCY MINUTES OF EXECUTIVE COMMITTEE (EC) MEETING

May 11, 2026 11:30 p.m. – 12:45 p.m.

Hosted at YCFC&WCD Headquarters
34274 State Highway 16, Woodland

ATTENDANCE

Committee Members Present: Dave Schaad, Carol Scianna, Lee Smith, Courtney Doss, and Tom Barth (arrived at item 4)

Staff Present: Kristin Sicke, Erik Cadaret, Nathan Fisher, Sarah Leicht, Rebecca Smith

Other Directors: Tom Slater

AGENDA

1. **Call to Order:** Meeting was called to order by Carol Scianna at 11:31 am.

2. **Adding Items to the Posted Agenda:** Nothing to report.

3. **Public Comment:** Nothing to report.

4. **Closed Session: Existing Litigation (YSGA vs. DWR)**

Closed session conference with legal counsel – existing litigation under Government Code section 54956.9(d)(1), Sacramento Superior Court Case No. 26WM000070. The Committee entered closed session at 11:32 and left closed session at 11:48. No action was taken.

5. **Administrative Items (Sicke):**

- a) Approve April 9, 2026 Meeting Minutes
- b) Review Financials: 4/2 - 5/6/26: Kristin reviewed necessary upcoming changes to the budget.
- c) Approve Payments: Payments were provided with the agenda packet.

Director Schaad moved to approve items a) and c) as presented, seconded by Director Smith and approved unanimously.

6. **Fee Study Update**

- A. Final Fee Study Report: The final report is now posted on the website. The public hearing and fee study report were noticed in the newspaper. YSGA also posted a parcel map on the website to help landowners distinguish their parcel classification.
- B. Corrections Form: YSGA is working with Catherine Hansford to finalize a corrections form that can be posted on the website to allow corrections before fee amounts are sent to the assessor.
- C. Draft Reserve Policy: Kristin provided a draft policy for review. The Committee discussed how member agency dues from FY 25/26 should be accounted for, and whether the reserve amount is appropriate. The Executive Committee recommended taking the discussion to the full Board of Directors for direction.

7. Fiscal Year 26/27 Draft Budget and Workplan

Erik reviewed a draft FY 26/27 budget and 5-year work plan for the agency, as well as potential grant funding and plans to increase YSGA capacity. The draft RFQ will be provided with the May Board agenda.

8. Update on Yolo County Urgency Ordinance

Kristin summarized the discussion that occurred at the April 28 Yolo County Board of Supervisors meeting. The Committee discussed sending a letter to the Board of Supervisors regarding the YSGA Focus Areas and the moratorium. Kristin will send a draft letter to the Executive Committee for review.

9. Next Executive Committee Meeting Date: June 16, 2026 at 11am.

10. Adjourned at 12:53 pm.

Respectfully submitted,

Kristin Sicke
Executive Officer, Board Secretary

YOLO SUBBASIN GROUNDWATER AGENCY MINUTES OF EXECUTIVE COMMITTEE (EC) MEETING

June 16, 2026 11:00 a.m. – 12:15 p.m.

Hosted at YCFC&WCD Headquarters
34274 State Highway 16, Woodland

ATTENDANCE

Committee Members Present: Dave Schaad, Carol Scianna, Lee Smith, Courtney Doss

Staff Present: Kristin Sicke, Erik Cadaret, Nathan Fisher, Sarah Leicht

AGENDA

1. **Call to Order:** Meeting was called to order by Carol Scianna at 11:01 am.
2. **Adding Items to the Posted Agenda:** Nothing to report.
3. **Public Comment:** Nothing to report.
4. **Administrative Items (Sicke):**
 - a) Approve May 11, 2026 Meeting Minutes
 - b) Yolo County LAFCo Draft Municipal Service Review: Kristin provided a copy of the draft review to the Committee. She stated that she spoke to LAFCo about YSGA's participation in IRWM. The review recommends recent audits be posted to the YSGA website; Kristin stated the audits will be posted as they become available.
 - c) Review Financials: 5/7 – 6/10/26: The Committee discussed the difference between budget vs actual on the budget reconciliation report. A budget amendment was recommended for FY 25/26 to correct the issues caused by delay in grant reimbursements and the extension in the grant funding schedule and availability.
 - d) Approve Payments: Payments were provided with the agenda packet.
 - e) Discuss Request for Amendment of Professional Services Agreement with INTERA: Erik Cadaret reviewed the status of INTERA's professional services for completing the YSGA's 2027 Periodic Evaluation. Cadaret requested that the Executive Committee consider recommending a budget amendment and contract extension not to exceed \$30,000 for completing the work.
The Executive Committee considered entering into the amended contract in the amount up to \$30,000, subject to the full Board's approval at the July 21 Board meeting.

Director Schaad moved to approve items a) and d) as presented, seconded by Director Smith and approved unanimously.

Item e): The Executive Committee recommended entering into the amended contract in the amount up to \$30,000, utilizing general funds, subject to the full Board's approval in July. The recommendation was moved by Director Smith, seconded by Director Doss, and approved unanimously.

5. YSGA Fee Administration

Kristin provided updates on progress towards implementing the fee. The Committee discussed how to address the motion made at the May Board of Directors meeting to return with an investigation of fee revisions for the Clarksburg area and rangeland within one year. Director Smith suggested first estimating the potential impact on the remaining Tier 2 Ag fees if rangeland and Clarksburg fees decrease. The Committee requested that Catherine return with an initial proposal and analysis of the impact of fee changes in November. Director Schaad requested a summary of the motion and proposed next steps at the July Board of Directors meeting to ensure that the Board's intention was captured accurately.

6. Update on Request for Qualifications and New Positions

Erik provided an update on RFQ responses and new positions. Several applications have been submitted for the outreach position.

7. Update on Yolo County Urgency Ordinance – Letter to Yolo County Board of Supervisors

The Committee discussed how to best communicate with the County Board of Supervisors.

8. Next Executive Committee Meeting Date: July 8, 2026 at 12pm.

9. Adjourned at 12:18 pm.

Respectfully submitted,

Kristin Sicke
Executive Officer, Board Secretary

Yolo Subbasin Groundwater Agency
Hungry Hollow Groundwater Working Group
Project and Management Actions Rankings
November 20, 2025
Updated on May 22, 2026

Detailed PMA # 1 – 9, and 17 Ranking Results by YSGA Staff

PMA #	PMA Name	Working Group Area	Project Category	Primary Method	Secondary Method	Tertiary Method	Implementation Options	Project Concept	Responsible Party
17	Western Hills Erosion Control and Flood MAR	West	Local Stormwater Capture	Local Stormwater Capture	Land management Practices	Recharge Groundwater	1, 2, 3, 6, 7	Landowners and District staff identified several erosion and flood control issues that originate from the western hills that will have a significant impact on the success of Projects 5, 3, 7, 8, and 2. This project proposes the following: Goodnow Slough (1) Installation of “rock dams” in the upper reaches of Goodnow Slough (2) Construct diversion structure to divert flows into a 30-acre sediment trap / flood control basin on North Side of Williams Property south of Rd 15B. This basin would trap sediment and temporarily capture stormwater for spilling back into Goodnow Slough for recharge during sunny day conditions. (3) Cover crop 600 acres on eastern side of Williams Property to pilot cover cropping as a means of increasing infiltration, reducing flooding, and increasing soil moisture retention for dry periods. (4) Construct 1-acre settling basin at RD 86 & 15B Fox Canyon Slough (1) Installation of “rock dams” in the upper reaches of Fox Canyon Slough (2) Construct diversion structure to divert flows into a 10-acre sediment trap / flood control basin. This basin would trap sediment and temporarily capture stormwater for spilling back into Goodnow Slough for recharge during sunny day conditions. Other Slough (1) Installation of “rock dams” in the upper reaches of the Other Slough (2) Construct diversion structure to divert flows into a 10-acre sediment trap / flood control basin. This basin would trap sediment and temporarily capture stormwater for spilling back into Goodnow Slough for recharge during sunny day conditions.	Cobram, Hammerness, Durst, District Project Partners: Yolo RCD, Center for Land Based Learning, others

Prioritization Criteria		Notes	Score
1	Impact to Groundwater Levels	- Stabilizes or increases groundwater levels by increasing aquifer recharge. Achieves this by capturing stormwater for recharge. This would have an additive effect on District's winter recharge program permitted diversions.	4
2	Project Funding	- May have partial funding for the life cycle of the project. Dependent on landowners and District co-funding to move project forward.	2
3	Cost-effective	- High \$/AF relative to other projects and management actions.	1
4	Co-benefits	- Mitigation of drought impacts. - Stormwater capture (i.e. flood management). Anticipated to limit flooding potential of Goodnow Slough and reduced flood damage to culverts, roads, and crops. - Water supply reliability. - Support habitat.	4
5	Economic Benefits	PMA maintains land value, ability for landowners to obtain loans, and grower operations.	2
6	Benefits to small water systems/domestic wells	- Benefits nearby shallow domestic wells - Addresses Human Right to Water	4
7	Regulatory Barriers	- Project has significant regulatory barriers to implementation. They include: 1) Permitting for any streambed alteration for sloughs to construct rock dams and divert water 2) Permitting for rock dams & stormwater retention pond construction	2
8	Benefits Groundwater Reliant Area	- Project would benefit a heavily groundwater reliant area	4
9	Community Support	- Some concerns or opposition is anticipated	2
Total Score			25

DRAFT

Yolo Subbasin Groundwater Agency
Hungry Hollow Groundwater Working Group
Project and Management Actions Rankings
November 20, 2025
Updated May 22, 2026

Summary of Ranking Results by YSGA Staff

PMA #	PMA Name	Project Concept	Responsible Party	Total Score (36 max)	Ranking
17	Western Hills Erosion Control and Flood MAR	Landowners and District staff identified several erosion and flood control issues that originate from the western hills that will have a significant impact on the success of Projects 5, 3, 7, 8, and 2. This project proposes the following: Goodnow Slough (1) Installation of “rock dams” in the upper reaches of Goodnow Slough, Fox Canyon Slough, and other sloughs to trap sediment and slow down runoff (see map) (2) Construct rock dam with diversion structure to divert flows into sediment trap / flood control basins. These basins would trap sediment and temporarily capture stormwater for spilling back into Sloughs for recharge during sunny day conditions. Sediment traps would be excavated to remove accumulated sediment. (3) Cover crop acres on west side at base of hills to pilot effectiveness of native grasses to increase infiltration, soil moisture retention, reduce flooding, and reduce applied water usage. (4) Obtain CDFW Lake Streambed Alteration Permit for items 1 & 2, but for all of Hungry Hollow slough maintenance and rehabilitation work.	Landowners, District Project Partners: Yolo RCD, Center for Land Based Learning, YSGA	25	5
5	Hungry Hollow Winter Water On-farm Recharge	Sign up over 6,000 acres with existing surface water connections to the District to take winter water for on-farm recharge. Can achieve > 6,000 AFY of recharge.	Landowners, District	28	1
3	Oat Creek Trickle Flow Recharge	AgIS pipeline connects to Hungry Hollow canal, can move excess water in the canal during the winter and discharge directly into Oat Creek and a leaky storage pond for trickle flow recharge. Can achieve up to 600 AFY of recharge.	AgIS Capital, District	27	2
7	Increase Conjunctive Use	Sign up over 3,000 acres currently without a surface water connection voluntarily connect to the District to achieve in-lieu recharge. Can achieve > 6,000 AFY in-lieu recharge when using surface water in 7/10 years.	Landowners, District	26	3
8	Voluntary Land Conversion and Water Management Practices	Sign up over 6,000 acres that land use changes could be implemented to improve soil absorption and infiltration (e.g. cover cropping, change of water source, land use application of pesticides, etc.). Will need to define performance metrics to quantify recharge benefits and outcomes. Can achieve > 6,000 AFY of recharge.	Landowners, District	26	4
2	Fox Canyon Slough Stormwater Capture and Recharge	Capture stormwater from the south fork from No Name Slough that parallels County Road 14 and reduce flooding by 1) upgrade 48” box culvert at north end of Hungry Hollow Canal at RD 87 to 72”, rehabilitate Hungry Hollow Canal between Rd 87 and Rd 88, upgrade bridge box culvert at Rd 88, 2) construct 16 acre stormwater retention/regulating pond with 49.5 AF capacity and plant 10 acre native vegetation/habitat zone, and 3) release held stormwater for hungry hollow canal recharge. This	Boundary Bend, other landowners, District	25	5

PMA #	PMA Name	Project Concept	Responsible Party	Total Score (36 max)	Ranking
		project would alleviate flooding damage to nearby parcels within the vicinity of Counrty Roads 14, 87, and erosion damage to Hungry Hollow canal near County Road 88, and increase recharge to groundwater. Can achieve > 2,000 AFY of recharge.			
1	Goodnow Slough Stormwater Capture and Recharge	Capture stormwater from the north and south fork of Goodnow Slough on up to 32 Acre temporary storage pond (or smaller pond with dry wells) on Cobram's property to later release the water downstream for recharge on Durst Organic Growers, Bullseye, and Corwin (and other participating landowners) fields for on-farm recharge, recharge ponds, and hungry hollow canal recharge. This project would alleviate flooding damage within the vicinity of County Road 15B, 87, and 16, and increase recharge to groundwater. Distributes recharge to West and East side of Hungry Hollow. Can achieve > 6,000 AFY of recharge.	Boundary Bend, Durst Organic Growers, Bullseye, Corwin (Shaupp), and others; District	24	6
4	Western Hillslope Stormwater Capture and Recharge with Dry Wells	Pilot stormwater capture drywells to increase recharge on lands owned by P. Hammerness and J. Durst. Funding and implementation tied to USDA-ARS. Can achieve > 50 AFY of recharge.	Hammerness, Durst, USDA-ARS, District	22	7
6	Irrigation Season Land Management Practices to Support Recharge	Sign up over 6,000 acres with existing surface water connections to the District to over irrigate tolerant crops during irrigation season to increase applied recharge. Idea is that using surface water to over irrigate when water is available is a cheaper alternative than allocation, etc. Will need to define performance metrics to quantify recharge benefits and outcomes. Suitable to start as pilot project. Can achieve > 6,000 AFY of recharge.	Landowners	22	8
9	Voluntary Demand Management and Well SCADA Upgrades	Sign up over 6,000 acres to reduce groundwater pumping by 5 - 15% in 1) water years when the District has a partial or zero allocation or 2) More than 2 RMW's have a MT exceedance for more than one Fall period, and 3) upgrade small growers wells with SCADA controls to allow for remote control operation. Would start as pilot program to measure and quantify outcomes. May require setup of pumping fee to fund mitigation bank for crop yield losses. NOTE: Hard to enforce across a geographic area where not all growers have SCADA to efficiently manage their pumping at low cost. May produce mixed results.	Landowners, District, YSGA	16	9
10	Grant Funding Assistance Program	YSGA contract with grant specialist (paid for by landowners) to identify and pursue grant opportunities to fund Hungry Hollow PMA implementation, including CDFA's SWEEP program.	Landowners, YSGA	Not ranked. YSGA Staff determined that this would be more appropriate for a Subbasin wide program.	

PMA #	PMA Name	Project Concept	Responsible Party	Total Score (36 max)	Ranking
11	Landowner Technical Assistance Program	YSGA contract with agronomist/agricultural engineer/suppliers (paid for by landowners or utilize UC cooperative extension) to provide on-call technical assistance, training, and equipment access to landowners, as well as develop training opportunities featuring landowner-to-landowner knowledge sharing and a private self-assessment tool for landowners to evaluate the contribution of existing land management practices to groundwater sustainability	Landowners, YSGA	Not ranked. YSGA Staff determined that this would be more appropriate for a Subbasin wide program.	
12	Historically Non-Irrigated Acreage Expansion Restrictions	Landowners work with County to inform land use zoning policy changes to restrict the expansion of irrigated acreage on historically non-irrigated acreage	Yolo County	Not ranked. Already occurring through well moratorium.	
13	Well Permitting Ordinance Update	Landowners work with County to inform well permitting ordinance changes	Yolo County	Not ranked. Already occurring through well moratorium.	
14	Hungry Hollow Governance Structure Development	Create governance structure for Hungry Hollow Groundwater Working Group	YSGA	Already complete (Charter).	
15	2028 Subbasin Model Update (Groundwater Portion Only)	YSGA significantly update groundwater potion of subbasin model by 2028	YSGA	In progress	
16	Voluntary Groundwater Level Monitoring Program	Landowners voluntarily collect quarterly water level data and provide to YSGA	Landowners, YSGA	In progress

July 15, 2026 DRAFT (To be adopted by YSGA Board of Directors on July 20, 2026)

TO: The Honorable Chair and Members of the Yolo County Board of Supervisors

FROM: YSGA Board of Directors

RE: YSGA's Update on Groundwater Sustainability Plan (GSP) Implementation

Dear Chair Allen and Members of the Board of Supervisors:

Thank you for the opportunity to provide a groundwater update at your April 28, 2026 Board meeting. While the Yolo Subbasin Groundwater Agency (YSGA) and the County's groundwater-related authorities are distinct, we see our efforts as closely interconnected. Our collective success will depend on how effectively we coordinate and collaborate to address these challenges moving forward. To that end, we invite two members of the Board to meet with the YSGA Executive Committee to discuss how we can effectively work together on this important effort. This letter provides the YSGA Board's opinion on the current state of the moratorium on new agricultural wells within Yolo County, an update on the YSGA's implementation of the Groundwater Sustainability Plan, and areas we see as collaboration opportunities.

Background

When the Sustainable Groundwater Management Act (SGMA) was enacted in 2014, agencies (and joint powers authorities) with water management responsibilities had the opportunity to take on new roles implementing SGMA as a Groundwater Sustainability Agency (GSA). The GSAs did not replace County oversight. Rather, counties and cities retained all of their traditional broad authorities related to land use regulation, water management, well permitting and construction oversight, police powers, while also enjoying new authorities and responsibilities to the extent they elected to serve as GSAs.

YSGA was formed in 2017 as a joint powers authority of 19 member agencies with water management and land use authority (including the County) and a smaller number of non-signatory affiliated parties with an interest in groundwater in the region. As the GSA under SGMA for the basin, YSGA is statutorily required to prepare and implement a 20-year Groundwater

City of Davis • City of West Sacramento • City of Winters • City of Woodland • County of Yolo • Dunnigan Water District • Esparto Community Service District • Madison Community Service District • Reclamation District 108 • Reclamation District 150 • Reclamation District 307 • Reclamation District 537 • Reclamation District 730 • Reclamation District 765 • Reclamation District 787 • Reclamation 999 • Reclamation District 1600 • Reclamation District 2035 • Yocha Dehe Wintun Nation • Yolo County Flood Control and Water Conservation District • University of California Davis • California American Water • Colusa Drain Mutual Water Company • Yolo County Farm Bureau • Environmental Representative • Rumsey Water Users Association

Sustainability Plan (GSP) for the Yolo Subbasin. In 2022, the YSGA adopted the Yolo Subbasin GSP, which contains the following sustainability goals:

1. Achieve sustainable groundwater management in the Yolo Subbasin by maintaining or enhancing groundwater quality and quantity through the implementation of projects and management actions to support beneficial uses and users.
2. Maintain surface water flows and quality to support conjunctive use programs in the Subbasin that promote increased groundwater levels and improved water quality.
3. Operate within the established sustainable management criteria and maintain sustainable groundwater use through continued implementation of a monitoring and reporting program.
4. Maintain sustainable operations to maintain sustainability over the implementation and planning horizon.

Moratorium on New Wells in Focus Areas

In 2023, in response to Executive Orders N-7-22 and N-3-23, YSGA developed and adopted detailed well permit verification procedures that are still in use today. These two executive orders directed that prior to a permitting authority issuing a permit for certain new wells or well modifications, it must obtain a written verification from the relevant GSA that the proposed well was “not inconsistent with” the GSP or with the sustainable management of the groundwater basin. As part of that process, YSGA identified “Focus Areas” within the Subbasin where local hydrogeology, data gaps, monitoring trends, or other considerations would trigger the YSGA to collect additional information from well permit applicants prior to issuing a written verification.¹ YSGA’s intent was for the Focus Areas Map to serve as an informational tool, and not a regulatory or enforcement mechanism. The Focus Areas Map is “a standalone document intended to support YSGA in its efforts to sustainably manage the underlying groundwater basin. It may be adjusted from time to time by an action of the YSGA Board, following an opportunity for public comment and review of the proposed changes”.

YSGA has coordinated with Yolo County throughout the well permitting and well verification process. While SGMA grants GSAs considerable discretion in managing groundwater resources, SGMA has constraints on that authority: GSAs cannot supersede the land use authority of a city or county, nor can they issue permits to construct, abandon, or modify groundwater wells without the express authorization of the County to do so (see Water Code §§ 10726.4 (b); 10726.8 (f).) YSGA understands that the County relied on YSGA’s designation of Focus Areas as a framework for its emergency well moratorium. For clarity, YSGA’s technical work in delineating Focus Areas for purposes of well verification did not analyze whether a moratorium was necessary in those areas, or whether new wells would undermine the sustainability of the underlying groundwater

¹ These materials titled [*YSGA Well Permitting Review Procedures*](#), and [*Delineation of Focus Areas Map and Guidelines and Evaluation Criteria for Hydrogeologist Reports to Address Executive Orders N-7-22 Paragraph 9 and N-3-23 Paragraph 4 through a Tiered Review Process TM*](#) respectively, were adopted after an extensive public process and can be found on YSGA’s website.

basin. Rather, YSGA's technical memo advised that inclusion in a 'Focus Area' was explicitly *not* "indicative of a particular region or well operation's overall sustainability". YSGA defers to the County's discretion regarding extension of the well moratorium, with appropriate considerations of the limited purposes of YSGA's designation of the Focus Areas.

SGMA empowers GSAs with broad authorities to carry out their sustainability goals, and YSGA has shown it is fully capable of wielding that statutory authority to manage the sustainability of groundwater in the Focus Areas and the entire basin. Indeed, these authorities and corresponding limitations are central to the "demand management" components of the GSP already adopted by YSGA and approved by DWR. With the authority granted under SGMA, YSGA may control groundwater extractions from individual wells or wells in the aggregate; may establish groundwater extraction allocations; may impose well spacing requirements; may establish fees for groundwater management; and is specifically directed to coordinate with the County on the well permitting process, keeping in mind local land use designations. SGMA also prohibits a GSA from making binding determination on a party's water rights and requires that YSGA perform these management functions consistent with Section 2 of Article X of the California Constitution, which directs that water resources be "put to beneficial use to the fullest extent of which they are capable, and that the waste or unreasonable use or unreasonable method of use of water be prevented." YSGA considers that these principles, bounded by the rule of reasonable beneficial use, are the key to protecting each landowner's right to access groundwater in a sustainable manner now and into the future, rather than a moratorium on new agricultural wells.

5-Year Workplan and Update on Progress

The YSGA has established a five-year workplan to advance groundwater sustainability through expanded monitoring, groundwater recharge, land subsidence mitigation, and community engagement.

We are pleased to report that the Yolo Subbasin continues to demonstrate strong progress toward sustainable groundwater management. The 2025 Water Year Annual Report shows no undesirable results across all Sustainable Management Criteria and meaningful improvements in groundwater recovery since the 2022 drought. With full surface water supplies enabling robust in-lieu recharge, the Subbasin is well-positioned for stable or improved conditions by Fall 2026—clear evidence that implementation of the GSP is working as intended.

Working with local agencies, landowners, and stakeholders, the YSGA is implementing projects across the Subbasin that improve groundwater management, reduce pumping impacts, increase recharge, and address localized challenges in areas such as Yolo Zamora, Dunnigan, Winters, Hungry Hollow Area, and Dunnigan Hills. YSGA's efforts highlighted below support long-term implementation of the GSP and progress toward sustainable groundwater management in the Subbasin.

- Adding numerous wells (including 4 multi-nested wells in data gap areas) and compiling over 16,000 well completion reports and geophysical data
- Proactively partnering with landowners in the Yolo Zamora area to implement projects that could offset more than 14,000 acre-feet (AF)/year of groundwater pumping and mitigate land subsidence concerns
- Supporting City of Winters in partnering with landowners to shift over 2,000 AF/year of groundwater pumping to surface water use to offset groundwater level declines in domestic wells nearby
- Expanding monitoring, hosting 19 community meetings, and establishing a Groundwater Working Group in the Hungry Hollow Area. This Group has prioritized 6 key projects expected to offset more than 6,000 AF/year of groundwater pumping to proactively solve flooding and erosion concerns and raise groundwater levels.
- Supporting Yolo County Flood Control & Water Conservation District who has diverted more than 40,000 AF of winter water into the aquifer since 2016
- Collaborating with Dunnigan Water District who has successfully coordinated the Dunnigan Area Recharge Program to recharge 14,000 AF and is actively installing infrastructure and building partnerships with landowners
- Coordinating with the South Colusa North Yolo (SCNY) Recharge Program who has enrolled over 82,000 acres, collected more than \$695,000, and recharged more than 2,000 AF in its first season

The SCNY Recharge Program is an excellent example of a voluntary, landowner-led groundwater recharge program that has united landowners, irrigation districts, and other stakeholders from South Colusa and North Yolo counties to tackle a 15,000 AF average annual overdraft and prevent costly state intervention. By funding practical, locally driven recharge projects, SCNY empowers growers to protect water levels, preserve land value, and secure the region's agricultural future. The YSGA is pursuing a similar approach with the Hungry Hollow Groundwater Working Group.

The YSGA and its member agencies are focused on prioritizing and increasing groundwater recharge and conjunctive use and ensuring the sustainable exercise of the groundwater basin. Demand management is one in a portfolio of actions the YSGA can implement to address Subbasin-wide and localized groundwater sustainability issues related to potential groundwater level and storage decline. An effective framework for that effort may include targeted limits on groundwater extraction, and an allocation model that can directly address excessive pumping, limiting extraction by overlying landowners to their reasonable and beneficial use of groundwater while taking care not to jeopardize their rights to such extraction. Additional data will need to be collected to ensure a clear connection between subsurface groundwater conditions, management actions, and to appropriately identify areas where demand management may be necessary. The YSGA will first seek a voluntary, incentive-based framework that will build consensus before

proposing specific demand management requirements. This will also require very close coordination with the County in its well permitting and land use activities.

Developing a successful demand management program will take time to thoughtfully create a transparent process, incorporate local knowledge, and demonstrate that stakeholder input materially affects decisions. At the same time, such a management system should also 1) incentivize winter recharge on farm fields bolstering dry year reserves, 2) disincentivize overextraction of groundwater during extended droughts that would lead to *prolonged* undesirable results, and 3) preserve the future of viable agriculture in Yolo County.

Invitation to Collaborate

The YSGA commends County staff's efforts in convening the agricultural well permitting workgroup, which has served as an educational forum allowing concerned citizens and impacted stakeholders to better understand the difference in authority between the County and the YSGA clearly articulating the difference in roles and responsibilities related to groundwater management. The workgroup has also fostered a collaborative dialogue among all to identify potential solutions for solving some of these more complex land use and water resource challenges. YSGA staff value the working relationship with County staff, and the opportunity to share during these meetings. Similar to the YSGA focusing on and limiting budget expenditures to meet state mandates required by SGMA, we acknowledge and understand the County's need to prioritize resource expenditures to mission-critical efforts during the current budget deficit.

YSGA is dedicated to collaborating with the County on groundwater management, as a respected member agency and planning partner, to ensure groundwater sustainability in our region now and into the future. It is imperative that our agencies continue to stay focused and work together to understand and manage the impact of land-use decisions on ongoing groundwater sustainability work and the County's agricultural economy; to prepare for and respond to drought periods; and to identify appropriate management actions through the GSA to ensure continued compliance with SGMA and to avoid state intervention. To ensure an effective working relationship, the YSGA Executive Committee invites two Yolo County Supervisors to attend a meeting in August or September to discuss coordination regarding permits for new agricultural wells and opportunities to collaborate on current and planned YSGA initiatives.

Thank you for your consideration.

Carol Scianna, YSGA Chair

On behalf of the YSGA Board of Directors

Yolo Subbasin Groundwater Agency Board of Directors **Meeting Agenda Report**

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 5

SUBJECT: Consideration: Approve Entering into Professional Services Agreement with Collier Geophysics (USBR Grant Funded)

INITIATED OR ☐ BOARD
REQUESTED BY: ☒ STAFF
 ☐ OTHER _____

☐ INFORMATION
☒ ACTION: ☒ MOTION
 ☐ RESOLUTION

ATTACHMENT ☒ YES ☐ NO

BACKGROUND

The Yolo Subbasin Groundwater Agency (YSGA) was awarded a WaterSMART Applied Science Grant by the US Bureau of Reclamation. The grant funds will expire if not expended before September 30, 2026. A portion of the grant funds are not fully allocated, and YSGA staff have identified an opportunity to collect additional geologic data to support model improvement.

YSGA staff propose working with Collier Geophysics to conduct geophysical investigations using seismic data to characterize the subsurface geologic structure (faults, folds, and bedding). Seismic data is commonly used by the oil and gas industry to support characterization of petroleum bearing formations and reservoirs. This data may be used to characterize faults, folds, and bedding within the Subbasin. It can also inform the delineation of contact between aquifer zones, areas of reduced groundwater flow and/or recharge, and changes in porosity. This information supports the development of a detailed Hydrogeologic Conceptual Model and the refinement of the YSGA Model as outlined in the YSGA 5-year work plan.

Attached is the proposal submitted by Collier Geophysics. Collier Geophysics will evaluate the data available for purchase from various data vendors and facilitate the purchase of data in areas where limited data is available (e.g. Dunnigan Hills). This contract is not to exceed \$56,000 and will be funded by the USBR WaterSMART Grant.

RECOMMENDATION

- a. The Executive Committee recommends approval of entering into a professional service agreement with Collier Geophysics not to exceed \$56,000.

Proposal #: 3312

Proposal Name: Yolo County Legacy Seismic Reflection Proposal

Proposal Site Location: Yolo County Flood Control & Water Conservation District | Yolo Subbasin Groundwater Agency

Client: Flood Control & Water Conservation District | Yolo Subbasin Groundwater Agency

Client Contact: Erik Caderet

Client Email: ecadaret@ycfcwcd.org

Client Phone: 530.908.8375

Proposal Type: Lump Sum

Date: 7/9/2026 (Quote valid for 90 days)

Collier is pleased to provide this proposal to evaluate available legacy 2D seismic reflection data within Yolo County's areas of interest. The proposal includes three phases: Phase 1, data evaluation; Phase 2, data purchase and processing cost estimation; and Phase 3, structural interpretation and evaluation for attribute processing. The review will identify relevant data coverage; coordinate with seismic data brokers; schedule data evaluations; assess data quality and acquisition parameters; and determine whether the data can support the project objectives. Collier will consult with several data brokers to develop a list of available seismic lines in the area of interest, including the age and acquisition parameters of each dataset. We will then screen the list to identify the most favorable survey datasets and lines and evaluate data quality either in person or through online sessions with the brokers. Preliminary screening indicates that many lines are present in the area, but some are likely too old or were acquired with parameters that are not favorable for the project objectives. However, several more recent surveys appear to have favorable acquisition parameters and warrant further evaluation. Collier will review available data samples from the most promising lines. Although the number of viable lines is not yet known, we anticipate evaluating 10 to 20 lines and preparing a brief feasibility report. Collier will also meet with Yolo County to review the findings, discuss recommended lines for purchase, and identify next steps. *Collier understands that Phase 1 and the recommendations of data to purchase must be conducive to allow Yolo County to purchase the agreed upon data by August 15th, 2026.*

Phase 1: Data Evaluation ROM Costs: \$6,000

After suitable data are identified for horizon tracking, Collier will coordinate Yolo County's purchase of the data on a per-mile basis and reprocess selected lines as needed to track

the target horizon. Collier will also incorporate lithologic and/or geophysical borehole logs to support synthetic generation, where available. Deliverables will include a report summarizing the workflow and interpretation, PDF images of the seismic lines before and after reprocessing, and digital files needed for the County's hydrogeologic models. Collier will attend a meeting to discuss the results after the draft report is complete.

Phase 2: Data Purchase and Reprocessing ROM Costs:

- **\$2500 / mile for purchasing the data**
- **\$2000 / mile to reprocess, report on data, provide digital files**

Phase 2 Not to Exceed \$50,000

OPTIONAL Phase 3: Data Structural Interpretation and Evaluation for Attribute Processing:

\$15,000 to \$30,000

After reprocessing, Collier will consult with Yolo County to determine the best approach for extracting useful information from the data. Collier will interpret the data in a 3D seismic interpretation package to map key horizons identified by Yolo County and, where sufficient geophysical log data are available, incorporate synthetic seismograms from selected wells. Results will be presented as interpreted seismic lines and maps of selected horizons in time, depth, or elevation, as appropriate. Collier will also assess the quality of the reprocessed lines to determine whether hydrogeologic properties such as lithology, porosity, and potentially permeability could be evaluated through seismic attribute analysis as a separate future phase. The ROM is provided as a range because the number of seismic lines and data quality have not yet been determined. Collier will provide a more detailed scope and cost estimate after the data evaluation is complete.

Name (printed): _____

Title: _____

COLLIER GEOPHYSICS' (COLLIER) GENERAL TERMS AND CONDITIONS

FEE PAYMENT

- 1) COLLIER will submit invoices to Client monthly following any month of significant activity or at key project milestones, and a final invoice upon completion of services. Invoices will show charges based on current COLLIER Fee Schedules or other agreed-upon basis, and will include a detailed separation of charges and supporting information.
- 2) Payment is due upon receipt of invoice. On accounts past due by forty-five (45) days, Client will pay a finance charge of 1.5 percent per month dating from the invoice date.
- 3) In the event Client requires expert-witness testimony, Client will pay COLLIER all past due balances before COLLIER will proceed to prepare for or offer testimony.
- 4) Client will pay the balance stated on the invoice unless Client notifies COLLIER of the particular item that is alleged to be incorrect within fifteen (15) days from the invoice date. Client will remit the balance of undisputed items in a timely manner while a disputed item is being reviewed.
- 5) In the event Client fails to pay COLLIER within forty-five (45) days following invoice date, COLLIER may consider that a breach of the consulting agreement and all duties of COLLIER may be suspended or terminated, and work product may be withheld, without liability of any kind to COLLIER.

OWNERSHIP OF DOCUMENTS AND CONFIDENTIALITY

- 1) All reports, field data and notes, laboratory test data, calculations, estimates, and other documents prepared in the course of consulting service shall remain the property of COLLIER. Client agrees that all reports and other work COLLIER furnished to Client or Client's agents which are not paid for, will be returned upon demand and will not be used for any purpose whatsoever.
- 2) Documents provided to COLLIER by Client will be returned to Client, upon request, at the completion of work at Client's cost.
- 3) Reuse of reports or other materials by Client or others, on extensions or modifications of the project or on other sites, without written permission from COLLIER or adaptation by COLLIER for the intended purpose, shall be at the user's sole risk, without liability on the part of COLLIER, and Client agrees to indemnify and hold COLLIER harmless from all claims, damages and expenses, including attorney's fees.
- 4) COLLIER shall maintain Client's project data and reports in strictest confidence, and will release such information to others only upon written permission from Client.

DISPUTES

- 1) Client will pay all collection expenses or litigation fees, including attorney fees, that COLLIER incurs in collecting any delinquent amount Client owes.
- 2) If the Client institutes a suit against COLLIER which is dismissed or for which judgment is rendered for COLLIER, Client will pay COLLIER for all costs of defense including attorney fees, expert witness fees and court costs.

INSURANCE AND INDEMNIFICATION

- 1) COLLIER will carry Workers Compensation, General Liability, Automobile Liability, Excess Umbrella-Form Liability and Professional Liability insurance policies in amounts which COLLIER considers adequate. Certificates of insurance will be provided to Client upon request. Within the terms and conditions of the insurance, COLLIER agrees to indemnify Client against loss caused by actions of COLLIER, its employees or its subcontractors. COLLIER will not be responsible for liability beyond the limits and conditions reflected herein and in the Certificate of the Insurance. At Client's request, COLLIER will seek additional insurance coverage or limits for specific projects, and will bill Client for the additional premium cost. COLLIER will require that its field subcontractors are insured to the same levels required of COLLIER by Client.
- 2) COLLIER's professional liability will be limited to the value of the consulting services performed.
- 3) COLLIER will not be responsible for any loss or liability related to negligence of Client others employed by Client, or from negligence by any person for whose conduct we are not legally responsible.
- 4) Neither the Client nor COLLIER, their respective officers, directors, partners, employees, contractors or sub-consultants shall be liable to the other or shall make any claim for any incidental, indirect or consequential damages arising out of or connected in any way to the Project or to this Agreement. This mutual waiver of consequential damages shall include, but is not limited to, loss of use, loss of profit, loss of business, loss of income, loss of reputation and any other consequential damages that either party may have incurred from any cause of action including negligence, strict liability, breach of contract and breach of strict or implied warranty. Both the Client and COLLIER shall require similar waivers of consequential damages protecting all the entities or persons named herein in all contracts and subcontracts with others involved in this project.

CUSTODY OF MATERIALS

- 1) In the course of work, COLLIER may take custody of and transport soil and/or water samples from Client's site. Upon the completion of evaluation and/or testing of such samples, COLLIER reserves the right to return the samples to Client at Client's expense, and Client agrees to accept such samples and the responsibility for their proper and legal disposal.
- 2) At no time, under any circumstances, will COLLIER personnel represent COLLIER or themselves as generators of waste, hazardous or otherwise, which may have to be removed from or disposed of on a site, and COLLIER personnel will not sign hazardous waste manifests on behalf of Client.

SUBCONTRACTORS

- 1) On occasion, COLLIER engages the specialized services of individual consultants or other companies to participate in a project. When considered necessary, these firms or other consultants will be used with Client's approval. The cost of such services plus a fifteen (15) percent service charge will be included in our invoice.
- 2) Alternatively, at Client's request, COLLIER will recommend contractor(s) or specialist(s) for Client to enter into direct contract(s) with. Invoices for these outside services will be issued to Client for direct payment to the contractor(s). COLLIER review and approval of each invoice will be provided on request. Under either alternative, COLLIER does not guarantee and is not responsible for the performance of the contractor(s) or the accuracy of their results.

CHANGES TO THE APPROVED SCOPE OF WORK

Once a scope of work is approved and signed, the Client must submit any changes or modifications to the scope of work to COLLIER in writing. COLLIER agrees to provide a response to change orders in a timely manner. Any changes or modifications to the approved scope of work will be at an additional cost, above and beyond the approved scope of work. The additional cost must be agreed upon and a written change order approved by COLLIER and the Client prior to the start of any new tasks.

STANDBY TIME

COLLIER will not conduct on-site work during inclement weather, extreme temperatures or other atmospheric conditions that jeopardize the health and safety of personnel and/or equipment. In the event that COLLIER incurs standby time due to inclement weather, delays by client and/or other on-site contractors working for the Client, and/or other conditions outside the control of COLLIER, Client agrees to pay 75% of personnel rates, 100% of equipment rates, and 100% of expenses.

GEOPHYSICAL & GEOLOGICAL INSTRUMENTATION SERVICES

COLLIER is equipped to provide specialized geophysical and geological instrumentation services according to project needs. Fees for these equipment services will be based on use charges at standard rates published by COLLIER plus fees for consulting services. Client agrees to be responsible for any equipment stuck downhole and the recovery thereof.

RIGHT OF ENTRY

Client will furnish right-of-entry on the site for COLLIER to conduct the work. COLLIER will take reasonable precautions to minimize damage to the land from use of its equipment but has not included in the fee the cost for restoration of damage that may result from site operations. If COLLIER is required to restore the land to its former condition, this will be arranged and the cost plus fifteen (15) percent will be added to our fee.

DAMAGE TO SUBSURFACE STRUCTURES

Reasonable care will be exercised in locating subsurface structures in the vicinity of proposed subsurface explorations. This will include contact with the local agency coordinating subsurface utility information (i.e., "Call Before You Dig" service) and a review of plans provided by Client for the project site. COLLIER shall rely upon any information provided by Client or Client's agent or representative. If the locations of underground structures are not known accurately or cannot be confirmed, then there will be a degree of risk to Client associated with conducting the work. In the absence of confirmed underground structure locations, Client agrees to accept the risk of damage and possible costs associated with repair and restoration of damage resulting from the work.

PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS

If, at any time, evidence of the existence or possible existence of hazardous materials is discovered, COLLIER reserves the right to renegotiate any consulting agreement, the fees for our services and our continued involvement in the project. COLLIER will notify Client as soon as possible should unanticipated hazardous materials or suspected hazardous materials be discovered. Client agrees to compensate COLLIER for the cost of any and all measures that, in our professional onsite judgment are justified to protect the health and safety of our personnel, Client's employees, the public, and/or the environment. In addition, Client waives any claims against COLLIER and, to the full extent permitted by law, agrees to indemnify, defend and hold COLLIER harmless from any and all claims, damages and liability, including but not limited to cost of defense, in any way connected with the hazardous materials.

Conflicting Terms

These general terms and conditions shall govern and control, unless specifically provided to the contrary in any attached proposal or supplemental agreement. The fact that additional terms or provisions appear in one or the other document shall not, in and of itself, create a conflict.

STANDARD OF CARE

In accepting our proposal for consulting services, Client acknowledges the inherent risks associated with any geological investigation. In performing professional services, COLLIER will use the degree of care and skill ordinarily exercised under similar circumstances by members of the profession practicing in the same or similar localities. COLLIER makes no express or implied warranty beyond our commitment to conform to this high standard of professional practice.

Yolo Subbasin Groundwater Agency Board of Directors

Meeting Agenda Report

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 6

SUBJECT: Consideration: Letter of Support for Colusa County Water District USBR Grant Application

INITIATED OR ☐ BOARD
REQUESTED BY: ☒ STAFF
☐ OTHER _____

☐ INFORMATION
☒ ACTION: ☒ MOTION
☐ RESOLUTION

ATTACHMENT ☒ YES ☐ NO

BACKGROUND

The Colusa County Water District (CCWD) is requesting a letter of support of the USBR WaterSMART Drought Response Program Grant Application for the South Colusa North Yolo Subbasins Water Accounting, Modeling, and Infrastructure Improvements (Project). The Project scope includes the following:

- Identifying where and how much groundwater pumping is occurring by developing a list of all active irrigation wells (including well specifications) and installing monitoring equipment, as feasible, to accurately track groundwater demands (e.g., groundwater well flow meters).
- Incorporating new data with existing online decision support tools to help landowners and regional water authorities identify alternative water supplies or water management options.
- Evaluating pumping capacities, user restrictions, and water delivery needs.
- Completing small-scale district infrastructure improvements to support recharge project implementation as feasible.

The letter of support also comes with a request for supporting stakeholder outreach, providing feedback on project findings, and considering policies to advance Project objectives as needed. Jordon Navarrot of Dunnigan Water District will provide an update on CCWD's grant application and the request for support by the YSGA.

RECOMMENDATION

- a. Recommend approving the Executive Officer to sign and submit a letter of support for Colusa County Water District's USBR WaterSMART Grant Application

Yolo Subbasin Groundwater Agency

Groundwater Sustainability Agency

July 20, 2026

Bureau of Reclamation
Attn: NOFO Team
Denver Federal Center
6th Avenue and Kipling Street - Bldg. 67, Rm. 152
Denver, CO 80225

RE: Support of the Bureau's WaterSMART Drought Response Program Grant Application for the SCNY Subbasins Water Accounting, Modeling, and Infrastructure Improvements

Dear USBR WaterSMART Drought Response Program NOFO Team:

The Yolo Subbasin Groundwater Agency (YSGA) serves as the Groundwater Sustainability Agency (GSA) for the Yolo Subbasin and is pleased to provide this letter of support for the South Colusa – North Yolo (SCNY) Subbasins Water Accounting, Modeling, and Infrastructure Improvements (Project). Cost-effective groundwater recharge projects are critical to improve drought resiliency and groundwater conditions and mitigate land subsidence and declining groundwater levels caused by increased dependence on groundwater during droughts.

The YSGA is supportive of the Project scope including:

- Developing a list of all active irrigation wells and installing monitoring equipment
- Incorporating new data with existing online decision support tools
- Evaluating pumping capacities, user restrictions, and water delivery needs
- Completing small-scale district infrastructure improvements

The YSGA is willing to support stakeholder outreach, provide feedback on project findings, and consider policies to advance Project objectives as needed. We are pleased that it will enhance interbasin coordination between the Colusa and Yolo Subbasins.

Please feel free to contact Kristin Sicke at ksicke@yolosga.org if you need any additional information or supporting documentation.

Thank you for your time and thoughtful consideration.

Sincerely,
Kristin Sicke
Executive Officer

Yolo Subbasin Groundwater Agency Board of Directors

Meeting Agenda Report

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 7

SUBJECT: Presentation: Update on Fee Study

INITIATED OR ☐ BOARD
REQUESTED BY: ☒ STAFF
☐ OTHER _____

☒ INFORMATION
☐ ACTION: ☐ MOTION
☐ RESOLUTION

ATTACHMENT ☐ YES ☒ NO

BACKGROUND

In June 2025, the YSGA initiated a Fee Study to develop a permanent funding mechanism that will ensure the YSGA can remain financially self-sufficient while distributing costs reasonably among all who benefit from sustainable groundwater management. Since February 2026, the YSGA has completed the following outreach, which included mailing postcards to all 7,200 Assessor Parcel Numbers that are in the Yolo Subbasin.

Outreach and Public Workshops

YSGA and HEC developed a [Fee Study Newsletter](#) and [Fee Study FAQs](#), mailed postcards, and published newsletters in local publications in preparation for public workshops and outreach activities related to the Fee Study. The following public outreach has occurred:

- February 19: Yolo County Cattleman's Association
- March 10: Yolo County Farm Bureau Board Meeting
- March 11: Clarksburg at 1883 Clarksburg Schoolhouse
- March 12: Winters at Fairfield by Marriott Inn & Suites
- March 16: Woodland at Woodland Community and Senior Center
- March 17: Dunnigan at Dunnigan Fire Protection District
- March 18: Esparto at Capay Valley Health and Community Center
- March 19: Zoom Virtual Workshop
- Brief updates about the proposed fee were also provided at the following meetings:
 - March 19: Yolo County Resource Conservation District
 - April 18: Yolo County Board of Supervisors
 - March 3, April 7, and May 12: YCFC&WCD Board of Directors

The presentation slides from the public workshops are available on the YSGA's website at the following location:

<https://www.yologroundwater.org/files/dc03829dc/Public+Workshops+In+Person+Final.pdf>

At the May 18, 2026 Board of Directors meeting, the YSGA Board of Directors received the [final Fee Study Report](#) from Hansford Economic Consulting (HEC), held a public hearing, and adopted the proposed fee. The fee will support critical regulatory activities to remain in compliance with SGMA and retain local control of groundwater resources management.

Staff will provide updates and a presentation on the following:

Tier 2 Corrections Requests

YSGA staff will review the process developed to allow for corrections of the Tier 2 fees for dry land farming and provide an update on the corrections received by July 15.

Review of May Motions and Proposed Next Steps

At the May 18, 2026 Board meeting, the YSGA Board directed staff to return with options for examining alternative fee structures for Clarksburg Management Area and dry land farmers before the 2028 regulatory fee adoption. YSGA staff will review the Board's direction and discuss next steps.

RECOMMENDATION

This item is for informational purposes only. No action is required.

Yolo Subbasin Groundwater Agency Board of Directors
Meeting Agenda Report

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 8

SUBJECT: Report of the Chair and Executive Officer

INITIATED OR ☐ BOARD
REQUESTED BY: ☒ STAFF
 ☐ OTHER _____

☒ INFORMATION
☐ ACTION: ☐ MOTION
 ☐ RESOLUTION

ATTACHMENT ☒ YES ☐ NO

BACKGROUND

The YSGA Chair and Executive Officer will provide either an oral or written report on recent activities.

A written report from the YSGA Executive Officer is attached.

RECOMMENDATION

This agenda item is for informational purposes only. No Board action is required.

Date: July 21, 2026

To: YSGA Board of Directors

From: Kristin Sicke, Executive Officer

Subject: Report of the Executive Officer

Recommendation

For informational purposes only. No Board action required.

Background

The following is an update to the Board of Directors of the YSGA on activities and issues related to the ongoing implementation of the Sustainable Groundwater Management Act (SGMA). This report should be considered as a summary document so that Board members and other interested parties can quickly read about the general activities taking place between YSGA Board meetings. Board members should feel free to contact me at any time for more detail or with ideas and/or questions that they might have regarding the program.

Since the May 18, 2026 meeting of the YSGA Board of Directors, the following activities have taken place.

Program Administration

Two meetings were held by the YSGA Executive Committee (EC) on June 16 and July 8. EC members Carol Scianna, David Schaad, Lee Smith, Joel McCoy (serving temporarily during Courtney Doss's maternity leave), and Tom Barth were in attendance and discussed logistical items related to YSGA administration and the implementation of the Groundwater Sustainability Plan (GSP). The Committee received updates on the fee corrections process and discussed alternative governance structures. The next YSGA Executive Committee meeting is scheduled for August 11 from 12 p.m. to 1:15 p.m.

YSGA staff continue to coordinate with stakeholders and to schedule and participate in community meetings for ensuring successful outreach during GSP implementation. Staff also continue to communicate with Solano Subbasin GSA, North American Subbasin, Sutter Subbasin, and Colusa Groundwater Authority on data/information sharing and project opportunities, as well as other GSAs and Counties on their well permitting activities.

The Yolo Groundwater website <http://yologroundwater.org> was updated as needed. A calendar of current events is posted to the website.

Program Implementation

- Public Outreach
 - Developed outreach and communication materials for the Fee Study public workshops (available on our website: <https://www.yologroundwater.org/fee-study>)
 - Ongoing correspondence with concerned stakeholders to answer questions about SGMA and the Yolo Subbasin Fee Study.
 - Staff updated the interactive parcel map to allow stakeholders to find properties of interest and view how the proposed YSGA fee would apply to their properties. The map can be [accessed here](#).

- Projects and Management Actions
 - The YSGA's Request for Qualifications (RFQ) for Technical, Project Management, Grant Acquisition, and Outreach Services closed on June 29. 15 firms submitted statements of qualifications (SOQs), which will be reviewed by YSGA staff over the coming weeks. A list of qualified firms will be developed and used over the next three years to solicit bids for specific scopes of work described in the RFQ.
 - YCFC&WCD staff have been compiling data related to the January-February winter recharge activities during which about 4,500 AF was diverted from Cache Creek for recharge within the District's service area. Nearly a third (1,500 AF) was applied to farmer's fields for on-farm recharge. At one site, nearby shallow groundwater levels rose by 5.4 feet, which was the maximum observed response after water was applied. On a related note, YCFC&WCD submitted the long-term winter water right application in late April. SWRCB staff have completed an initial review of the application materials to identify any deficiencies in the application and provided a list of items for the District to correct. The noted deficiencies were relatively minor, and District staff have been working to prepare additional materials to submit back to SWRCB before the end of this month.
 - Coordinated with Yolo County in the well permitting process in accordance with the County's temporary urgency ordinance.
 - Received approved well permits and reviewed pending well permits from Yolo County's Environmental Health Division.
 - Continued implementation of projects funded by the SGMA Implementation Grant and WaterSMART Grant awards.
- Monitoring Network
 - Worked with the Community Alliance with Family Farmers (CAFF) to install 2 real-time groundwater monitoring sensors for small farms.
 - Continued implementation of citizen science program for individual well monitoring.
 - Continued outreach to landowners in data gaps to investigate potential for installation of monitoring equipment.
 - Coordinated with DWR to install four shallow monitoring wells along Putah Creek. All four wells have now been constructed, and dedicated monitoring equipment has been installed. The wells will monitor the depletion of interconnected surface waters and assist coordination efforts with Solano Subbasin.
 - Updating WRID and sgma.yologroundwater.org sites to improve usability and data type versatility
- Periodic Evaluation
 - INTERA and YSGA staff have prepared an initial draft of the WY 2019 – WY 2024 GSP Periodic Evaluation. The YSGA Technical Advisory Committee (TAC) reviewed the document, and YSGA staff are incorporating their feedback into a draft to be shared with the Board.

Program Outreach

Staff participated in a number of meetings, workshops, and discussions related to SGMA and groundwater recharge and protection, which included the following:

1. Participated in CA Water Data Consortium's Critical Water Accounting Response meetings (May 21, June 23; Cadaret, Leicht, and Fisher)
2. Hosted Hungry Hollow Groundwater Working Group Meeting (May 27; Directors Barth, Bennett, Scianna, Smith, and Wrysinski; Sicke, Cadaret, Leicht, and Fisher)
3. Participated in the GRA's GSA Summit (June 2-3; Director Smith; Sicke and Cadaret)
4. Participated in NCWA Colloquium Trip to DC (June 8-10; Director Navarrot; Cadaret)

5. Hosted YSGA Technical Advisory Committee Meeting (June 16; Directors Doss, Navarrot, and Smith; Sicke, Cadaret, Leicht, and Fisher)
6. Hosted YSGA Executive Committee Meeting (June 16 and July 8; Directors Schaad, Scianna, Smith, Doss, and Barth; Sicke, Cadaret, Leicht, and Fisher)
7. Met with Supervisor Frerichs and County Division of Environmental Health to Prepare for Western Yolo Ag Roundtable Discussion (June 18; Sicke and Cadaret)
8. Participated in ACWA's State Legislative Committee Meeting (June 22; Sicke)
9. Participated in Coordination Meeting with TNC (June 23; Sicke, Cadaret, Leicht, and Fisher)
10. Testify on AB 2026 in Senate Committee Hearings (June 23 and July 1; Sicke)
11. Participated in Supervisor Barajas and Frerichs Western Yolo Ag Roundtable Meeting (June 24; Directors Schaad and Tucker; Sicke and Cadaret)
12. Coordinated with CDFW on District's long-term winter water right permit application (July 26, Cadaret, Fisher)
13. Participated in Yolo County's Ag Well Working Group Meeting (July 2; Directors Smith and Tucker; Sicke and Cadaret)
14. Participated in ACWA's Groundwater Task Force Meetings for Vision for Our Water Future (July 2 and 9; Sicke)
15. Participated in ACWA's Vision for Our Water Future Working Group Meetings (May 27, June 3, June 10, July 1; Cadaret)
16. Participated in Westside Sacramento IRWM Coordinating Committee meeting (July 8; Leicht)
17. Participated in Coordination Meeting with Yolo County Division of Environmental Health and Consultants to Review Well Permitting Procedural Updates (July 9; Sicke and Cadaret)
18. Hosted Site Visit at Harlan Family Ranch to Discuss Slough Maintenance Projects for Enhancing Groundwater Recharge (July 14; Sicke and Cadaret)
19. Met with RWA to Coordinate on Regional Groundwater Issues and Projects (July 16; Sicke and Cadaret)

Other Items of Note

On [June 24, PBS KVIE Abridged](#) included a farm dispatch update from Jordon Navarrot on the South Colusa North Yolo (SCNY) Group.

[On June 26, Governor Newsom](#) appointed Jared Blumenfeld as a State Water Resources Control Board member (he previously served as CalEPA Secretary 2019-2022), and re-appointed Dorene (Dee Dee) D'Adamo (serving since 2013).

On June 29, Governor Newsom appointed [Thomas Gibson as the new Department of Water Resources Executive Director](#).

On July 2, [Assembly Bill 2026 \(Aguiar-Curry\)](#) was re-referred to the Committee on Appropriations (Senate Appropriations Committee is scheduled for August 3).

Current Groundwater Conditions

Groundwater levels are continuing to lower as is typical during the summer. Looking at the real-time monitoring network, this July's average water level is approximately 2.7 feet higher than the average level at this time last year. When compared to 2022 elevations, this July's groundwater levels are on average 31 feet higher.

Included below are the following graphics that illustrate the current groundwater conditions and monitoring efforts:

1. A map showing the change in water level between July 2025 and July 2026 for the 35 real-time monitoring stations.
2. A map showing the change in water level between July 2022 and July 2026 for the 35 real-time monitoring stations.
3. Tiled hydrographs of the real-time monitoring wells illustrating depth to water for the past year.

***Well 31 is directly adjacent to an active agricultural well, so may show localized drawdown when that well is pumping.*

Well Permitting Update

In March 2024, YSGA adopted its Well Permit Review Procedures pursuant to Executive Orders (Eos) N-7-22 and N-3-23. The Well Permit Review Procedures were closely coordinated with Yolo County's well permit process in order to ensure consistency across both entities. On September 5, 2024, Governor Gavin Newsom issued Executive Order N-3-24, rescinding certain mandatory provisions of the prior EOs related to well permitting. On October 22, 2024, the Yolo County Board of Supervisors approved "Ordinance No. 1569 - An Urgency Ordinance Temporarily Extending Certain Requirements on the Issuance of Agricultural Water Well Permits in the Unincorporated Area of Yolo County Pending Completion of Long-Term Well Ordinance Amendments" ("Ordinance No. 1569"). Ordinance No. 1569 extends a majority of the well permitting procedures that were enacted under the prior Executive Orders, and so YSGA's basic permit review processes will not change.

On August 26, 2025, the Yolo County Board of Supervisors unanimously approved a 45-day moratorium on the approval of new ag water well permits on any parcel within the Focus Areas.

On October 7, 2025, the Board of Supervisors adopted Ordinance No. 1577, an urgency ordinance extending the temporary moratorium for up to an additional 10 months and 15 days (through August 25, 2026) to, among other things, allow time to better understand the impacts of land use changes, particularly the hardening of groundwater demand with increased conversion of land in the Focus Areas to perennial crops, on the sustainability of groundwater supplies.

Ordinance No. 1577 exempts certain wells from the moratorium, meaning well permits may be issued during the moratorium for wells falling within the following categories, provided they meet the additional well ordinance requirements: domestic wells producing less than two acre-feet per year, public supply system wells, monitoring wells, and minor alterations of production wells.

On November 4, 2025, the Board of Supervisors adopted amendments to Ordinance No. 1577, specifically Section 3.4, to add an additional exemption for certain replacement wells in the Focus Areas from the moratorium so that such replacement wells may be issued a permit while the moratorium is in effect, provided the replacement wells otherwise satisfy the applicable well ordinance requirements. To be considered a replacement well for purposes of the moratorium exemption, the well still needs to meet all of the following requirements:

- The replacement well has the same or smaller casing diameter and substantially similar (or deeper) casing depth, pump size/pump horsepower, and screen interval(s) to the existing well;
- The replacement well has a substantially similar or lower pumping capacity (gallons per minute or GPM) in comparison to the existing well;
- If records of the construction details, such as well depth and screen intervals are not available for a well being replaced, the applicant should make reasonable efforts to obtain the information through downhole investigative methods including tagging the total completed depth of the well or other methods;
- The existing well being replaced is destroyed under permit and as set forth in Section 6-8.1011 of the Yolo County Code of Ordinances;
- The replacement well will be located on the same legal parcel(s) irrigated by the existing well being replaced (i.e., the replacement well will be used to irrigate the same farmed area as the well being replaced); and
- The replacement well permit shall include conditions (1) while the moratorium is in effect, prohibiting certain crop conversions, as described below, within the area irrigated by the replacement well on or after the date Ordinance No. 1577 was adopted (October 7, 2025); and (2) requiring the applicant and property owner to comply with any post-issuance conditions that may be imposed to align the permit with requirements included in any ordinance adopted by the Board of Supervisors in connection with the

moratorium review process, e.g., potential requirement to install a meter. The procedure for imposing post-issuance conditions shall be included in any such ordinance. For purposes of the prohibition on crop conversions, the intent is to maintain the status quo while the moratorium is in place and protect against changes in types of agricultural crops that may increase or harden groundwater demands in the Focus Areas before completion of the studies contemplated in Ordinance No. 1577. Accordingly, the prohibition on crop conversions applies to changes in classifications of crops on lands served by the replacement well, such as converting dry farmed land to irrigated row or perennial crops or converting annual crops (e.g., tomatoes or corn) to perennial crops (e.g., almonds, walnuts, olives, pistachios, and grapes). For example, converting dry farmed land to irrigated row or perennial crops or converting annual crops (e.g., tomatoes or corn) to perennial crops (e.g., almonds, walnuts, olives, pistachios, and grapes) would be prohibited while the moratorium is in place. However, conversion of a crop to lower water demand crop classification, e.g., conversion from a perennial crop to an annual row crop would be permitted.

Replacement wells in these Focus Areas meeting the foregoing criteria, however, would still be subject to the well permit requirements already in place for new agricultural/irrigation wells per Urgency Ordinance No. 1569 and its predecessors (Urgency Ordinance No. 1578 and Ordinance No. 1579), including verification review required by the applicable GSA, well separation distance requirements, and submittal of well completion and well pumping capacity reports. In response to this change, YSGA staff have incorporated a small change to the Tier 1 Well Permit Review Form so that the applicant can indicate whether their application meets the criteria for a replacement well as defined by the County. This change was approved by the YSGA Executive Committee at their December 11 meeting.

The amended language for exemption replacement wells under Urgency Ordinance No. 1577 can be found in the County's November 4 Board meeting staff report with the following link ([identified as Attachment A](#)).

The County Board of Supervisors will be considering extension of the ag well moratorium at the July 21 meeting. County staff will be providing an update on ag well permitting discussions and updates to their review process. The agenda report can be viewed on their website at the following link: <https://public.destinyhosted.com/96561/agenda/agenda-item.cfm?seq=16674&rev=0>

Well permitting reviews by the YSGA between April 1, 2022 and July 17, 2026:

- 133 well permit applications have been transferred from YCEH for YSGA written verification
- 3 applications were revised to Domestic Wells
- 2 well permit applications were technically located in the Colusa or Solano Subbasins (outside of the Yolo Subbasin, but within the County boundaries)
- Of the 128 relevant well permit applications
 - ✓ 43 replacement well permits have received YSGA written verification
 - 1 replacement well was then revised to a new well and re-introduced into the queue
 - ✓ 64 new well permit applications have received YSGA written verification
 - ✓ 17 new well permit applications are currently in the queue
 - 10 applications pending receipt of a completed form from the applicant
 - Of these, 7 are within the Focus Areas
 - 3 applications completed Tier 1 and did not pass. These now require a Tier 2 review.
 - 4 applications are on hold pending receipt of additional information
 - ✓ 4 applications were withdrawn

Yolo Subbasin Groundwater Agency Board of Directors
Meeting Agenda Report

MEETING DATE: July 20, 2026

AGENDA ITEM NO. 9

SUBJECT: SGMA Implementation Grant Projects Update

INITIATED OR ☐ BOARD
REQUESTED BY: ☒ STAFF
 ☐ OTHER _____

☒ INFORMATION
☐ ACTION: ☐ MOTION
 ☐ RESOLUTION

ATTACHMENT ☒ YES ☐ NO

BACKGROUND

YSGA staff and project proponents will provide a presentation updating the Board on the progress of projects included in the SGMA Implementation Grant.

Component 2: GSP Implementation

YSGA staff have made significant progress completing work that advances projects and management actions described in the GSP.

YSGA's interns have successfully geolocated more than 10,000 well completion reports (WCR's) for domestic, irrigation, municipal water supply, and monitoring wells within the Yolo Subbasin. In parallel to this effort, Environmental Science Associates (ESA) worked with the YSGA to develop a novel approach using AI to rapidly and cheaply extract information from the WCR's to create a comprehensive dataset including lithology logs and well construction information.

ESA will present the approach, results, and how this effort supports future YSGA work to update the hydrogeologic conceptual model.

Hungry Hollow Area: The Hungry Hollow Groundwater Working Group has approved six projects to address flooding, erosion, and groundwater level declines, and to incentivize conjunctive use, soil and water conservation, and groundwater recharge. YSGA staff, with support from landowners, West Yost, Consero Solutions, Yolo RCD, and Center for Land-Based Learning, have completed the first draft of the Hungry Hollow Project Implementation White Paper (Executive Summary attached). The White Paper provides background on the history of flooding, erosion, groundwater levels, and other concerns noted by landowners. The Working Group will meet in September to identify project leads to continue progress advancing all six projects and continue discussions on drought planning and potential voluntary demand management.

Component 2 Deliverables completed to date

- Water Year 2022, 2023, 2024, and 2025 Yolo Subbasin GSP Annual Reports
- Yolo Subbasin Fee Study
- Yolo Subbasin GPS Station Subsidence Survey
- Addition of monitoring sites to monitoring network

Component 2 Deliverables to complete by April 2027 (in progress and on schedule)

- Responses to DWR Recommended Corrective Actions on 2022 Yolo Subbasin GSP (extracted from 2027 Yolo Subbasin GSP Periodic Evaluation)
- Yolo Subbasin Model Enhancement Technical Memorandum
- Interconnected Surface Water Sustainable Management Criteria Approach Technical Memorandum (extracted from 2027 Yolo Subbasin GSP Periodic Evaluation)
- Water Budget Summary for Hungry Hollow (extracted from Hungry Hollow Project Implementation White Paper)
- On-farm Pilot Project Guidance (extracted from Hungry Hollow Project Implementation White Paper)
- Hungry Hollow Project Implementation White Paper
- Updates to WRID interface
- GDE survey results
- Workshop presentation materials

Component 3: YCFC&WCD Winter Groundwater Recharge Program

After pre-consultation with CDFW and the State Water Resources Control Board (State Board), YCFC&WCD submitted a long-term permit application on April 20, 2026. The YCFCWCD requested a standard post-1914 appropriative water right for diversion of up to 100,000 acre-feet of excess winter water from Cache Creek for groundwater recharge in earthen canals, on farm fields, in recharge basins, and via aquifer storage and recovery wells. The District received a response from the State Board stating that several deficiencies need to be addressed to complete review of the application. The District is nearly done addressing the deficiencies and anticipates receiving an update from the State Board in August if the permit application is considered complete and ready for notice.

To save on permit application fees and to leverage the information already prepared from the long-term permit, YCFC&WCD is preparing a 180-day temporary winter water right permit application for Winter 2027 by July 31, 2026, and a 5-year temporary winter water right permit application that is anticipated to cover Winter 2028 through 2032 before January 1, 2027.

The District is conducting an evaluation of the Upper Cache Creek watershed surface water quality and its impact on the surface water and groundwater quality within the YCFC&WCD service area,

including potentially serviced lands in Yolo Zamora. Preliminary results from both studies were presented to the YCFC&WCD Board in July 2026. The District also recently released a flyer highlighting the positive results from partnering with landowners to achieve on-farm recharge in January 2026.

Component 3 Deliverables completed to date

- Signed landowner agreements to conduct on-farm recharge
- Photo and map documentation of flooded fields
- Installation of automatic gates to optimize groundwater recharge operations
- Submission of long-term winter water right permit

Component 3 Deliverables to complete by April 2027 (in progress and on schedule)

- Monitoring and assessment plan
- On-farm recharge report
- Long-term farm field recharge guide
- Workshop, outreach, and meeting materials

Component 4: City of Winters Feasibility Studies for Alternative Water Supplies

The design work and cost estimates are nearing completion for eight selected projects (four for wastewater reuse, four for surface water supply augmentation). The City of Winters will provide an oral update at the YSGA Board meeting that shares draft results and takeaways from the feasibility study.

Component 4 Deliverables completed to date

- None

Component 4 Deliverables to complete by April 2027 (in progress and on schedule)

- Recycled Water and Surface Water Supply Feasibility Study
- Workshops and meetings materials

Component 5: Yolo-Zamora Groundwater Recharge Pilot Project

David's Engineering has completed a draft feasibility study summarizing potential direct and in-lieu groundwater recharge project opportunities in the Yolo-Zamora region, incorporating feedback received from landowners and local agency staff. Several project concepts are explored in the study, under two main categories:

- Direct and in-lieu recharge with surplus Cache Creek water via China Slough (YCFC&WCD)

- In-lieu recharge with Sacramento River surface water via extension of DWD services

Project costs range from as low as \$15/AF for some projects up to \$125/AF at the high end.

YSGA Board approved Resolution No. 25-01 on July 21, 2025, which authorizes YSGA to serve as the lead agency to apply for a Lake and Streambed Alteration permit (LSA) for China Slough. CDFW provided the final LSA permit that provides regulatory coverage for China Slough rehabilitation for 10-years. YSGA and WLS are in discussions with landowners to setup an administrative process funded by landowners to facilitate oversight and coordination of rehabilitation of China Slough. YSGA and landowners will initiate work within China Slough starting October/November 2026.

YCFCWCD and WLS are working with landowners who are interested in moving forward with direct and in-lieu recharge with surplus water from Cache Creek projects in the area. On June 17, WLS and YCFC&WCD staff held a meeting with farmers in Yolo-Zamora who would receive water from the District. Eight representatives from five different farming companies were in attendance. District staff described an annexation process, including a phased approach where lands nearest the current district boundaries could be served first in order to pilot additional deliveries through the Acacia Canal and China Slough. Following successful pilot deliveries, the District may be open to additional deliveries and eventual annexation of the properties. The landowners were amendable to this approach and expressed support to advance additional design and planning of the construction projects that are necessary to improve the delivery of YCFC&WCD water to the project area. In addition to the YCFC&WCD project options, landowners in the northern Zamora area expressed interest in project options for surface water delivery from Dunnigan Water District. Discussions regarding next steps to advance these options are ongoing with DWD management, including system capacity analyses and cost estimates.

Maddie Munson from Water & Land Solutions will provide a verbal update to summarize the current status of the project implementation discussions with landowners.

Component 5 Deliverables completed to date

- 10% canal system design
- China Slough recharge and rehabilitation (CEQA, no challenges letter, Final LSA permit)
- Five outreach meetings

Component 5 Deliverables to complete by April 2027 (in progress and on schedule)

- Water availability and feasibility study
- China Slough recharge and rehabilitation (100% design)
- Construction report
- Recharge pilot project summary report
- Water conservation estimate table
- Workshop presentation materials

Component 6: Dunnigan Area Recharge Program

Component 6 Deliverables completed to date

Planning and Design:

- CEQA compliance documentation
- Advanced SCNY Region analysis and modeling
- Advanced Basis of Design Report & Recharge Operations Manual

Construction/Implementation:

- Three stream gauges along Buckeye and Bird Creeks
- One reverse tile drain system
- One recharge basin

Component 6 Deliverables to complete by April 2027 (in progress and on schedule)

- Conceptual level designs
- Design report and recharge operations manual
- Executed landowner agreements
- Photo documentation of recharge site upgrades
- Baseline conditions and recharge benefits technical memorandum
- Outreach materials
- Meetings with neighboring subbasins and districts

Jordon Navarrot will provide a brief presentation on The Dunnigan Area Recharge Program.

RECOMMENDATION

This agenda item is for informational purposes only. No Board action is required.

Hungry Hollow Project Implementation White Paper

Prepared by:

YSGA Staff

EXECUTIVE SUMMARY

The Hungry Hollow Project Implementation White Paper outlines a community-driven, collaborative approach to addressing long-standing flooding, erosion, and groundwater sustainability challenges in the Hungry Hollow watershed, located north of Esparto in Yolo County. Spanning approximately 49,620 acres, the area has faced recurrent flooding (typically occurring in 2 out of 3 years), erosion from western hills runoff, and declining groundwater levels during droughts, which may damage cropland and irrigation canals, and the operation of irrigation systems, domestic wells, and agricultural wells.

This white paper provides a comprehensive assessment and management framework for the Hungry Hollow groundwater area. It begins with an overview of the region's physical characteristics, including its soils, agricultural land use, and flooding and erosion challenges. It describes the collaborative community partnership established to support groundwater management, outlining stakeholder engagement, governance, and the role of the Hungry Hollow Groundwater Working Group. A significant portion of the document focuses on the hydrogeologic conceptual model, examining the area's geology, hydrology, groundwater conditions, water quality, land use, water budget, and aquifer dynamics, including the impacts of drought, precipitation, and groundwater recharge.

This white paper builds on decades of local stewardship efforts, including the 2011 Hungry Hollow Watershed Stewardship Plan, and advances implementation of the 2022 Yolo Subbasin Groundwater Sustainability Plan (GSP) through the Hungry Hollow Groundwater Working Group for the Hungry Hollow area. Formed in 2025 as an advisory body to the Yolo Subbasin Groundwater Agency (YSGA), the Working Group—comprising local landowners—has identified, prioritized, and recommended six voluntary projects and management actions to increase groundwater recharge, reduce pumping through conjunctive use, improve land management, and mitigate flood and erosion risks.

This white paper explains the six prioritized projects in more detail and establishes next steps for piloting projects that are ready to implement while continuing to develop the scope, schedule, and budget for conceptual projects. The six prioritized projects are summarized below:

- **Hungry Hollow Winter On-Farm Recharge:** Utilizing existing canal infrastructure to spread winter surface water on up to 6,000+ acres of agricultural land (planning-level benefit estimated as 4,000 acre-feet per year (AFY) direct recharge).
- **Oat Creek Trickle Flow Recharge:** Slow diversion of water into Oat Creek for bed infiltration (planning-level benefit estimated as 20 AFY direct recharge).
- **Increase Conjunctive Use:** Connecting groundwater-irrigated lands (potential ~2,500 acres) to surface water delivery for in-lieu recharge (planning-level benefit estimated as 3,300 AFY in lieu recharge).
- **Voluntary Land Conversion and Water Management Practices:** Cover cropping, soil health improvements, and related practices on ~3,300 acres (planning-level benefit estimated as 3,100 AFY reduced applied water/improved infiltration).
- **Fox Canyon Slough Stormwater Capture and Recharge:** Culvert maintenance, regulating pond, bank benching, and capture features (planning-level benefit estimated as 90 AFY direct recharge).

- **Western Hills Erosion Management and Flood Managed Aquifer Recharge:** Rock dams, sediment traps, basins, and cover cropping to reduce runoff and capture flows for recharge (planning-level benefit estimated as 300 AFY direct recharge).

Collectively, the portfolio offers approximately 11,000 AFY in recharge benefits (range: 5,400–21,800 AFY), sufficient to offset modeled groundwater storage deficits in the area while providing substantial co-benefits including reduced flood damage (historically estimated at \$16.80–\$173+/acre annually; inflation adjusted), improved soil health, habitat enhancement, and agricultural resilience.

A phased implementation is recommended over the next 3+ years, starting with pilots for on-farm and Oat Creek recharge using existing infrastructure, while advancing planning, design, permitting, and funding for the other projects (Conjunctive Use, Land Management Practices, Fox Canyon, and Western Hills). Funding will need to combine landowner contributions, local agency support (YSGA, YCFCWCD, Yolo RCD, and Center for Land-Based Learning), and external grants to advance projects. Success depends on continued landowner participation, adaptive management based on monitoring, and integration with broader YSGA efforts. Early implementation of one or more of the proposed projects would maximize long-term cost savings and benefits, significantly outperforming the status quo of delaying action for another decade.

This white paper provides the technical foundation, governance framework, and actionable path forward to achieve sustainable groundwater management and watershed health in Hungry Hollow.

1. INTRODUCTION

The Yolo Subbasin Groundwater Agency (YSGA) is the Groundwater Sustainability Agency (GSA) responsible for implementing the Sustainable Groundwater Management Act (SGMA) in the Yolo Subbasin. YSGA works collaboratively with local agencies, landowners, and stakeholders to develop and implement the Yolo Subbasin Groundwater Sustainability Plan (GSP), adopted in 2022, which establishes sustainable management criteria for groundwater levels, quality, subsidence, and interconnected surface waters.

The preparation and development of this white paper was funded by the Department of Water Resources (DWR) SGMA Implementation Grant awarded to the YSGA in 2024. It documents the extensive community partnership and data-driven process undertaken in the Hungry Hollow area to identify, prioritize, and advance specific projects and management actions consistent with the GSP.

Hungry Hollow, a ~49,620-acre watershed north of Esparto bounded by the Capay Hills, Dunnigan Hills, and Cache Creek, has a long history of flooding, erosion, and more recent concerns regarding groundwater declines during drought periods. Through the Hungry Hollow Groundwater Working Group—established in 2025 following years of engagement via the earlier Hungry Hollow Sustainability Committee—landowners, YSGA staff, and partners (including West Yost Associates, Consero Solutions, Yolo County Resource Conservation District [Yolo County RCD], and Center for Land-Based Learning) have developed a robust hydrogeologic conceptual model, assessed data gaps, evaluated implementation options, and selected a prioritized portfolio of projects.

This white paper summarizes the physical and hydrogeologic setting (Section 2 and 5), community partnership and governance (Sections 3–4), project selection process (Section 6), detailed project descriptions and benefits (Section 7), and implementation and funding strategies (Section 8). Attachments provide supporting documents, including the Engagement Strategy, Charter, geologic cross-sections, groundwater hydrographs, and project ranking details.

The recommendations herein support proactive, voluntary, multi-benefit actions that enhance groundwater sustainability, reduce flood and erosion risks, and sustain the productive agricultural economy of Hungry Hollow while respecting private property rights and building on decades of local stewardship.

The preparation and development of this white paper was funded by the DWR SGM Implementation Grant awarded to the YSGA January 2024.
